Tabletop Transmitter
Available in: Black,
White, & Wood Grain
4" x 2.75" x 1"

"On-Demand" Service = Faster Table Turns

Give guests the convenience of "on-demand" service with the Table Genie™ Push-For-Service system. When guests need service, they just press a button and the server appears like magic. The Table Genie systems can be configured to wirelessly send a message to a monitor in the server area or directly to a server's pager. It works in three or single-button mode, and each button can be programmed for specific messages (drink refill, check, manager, etc.). These units help you sell more food and beverage, keep your guests happy, and maintain a high level of staff productivity.

Seat	Req	Time	Seat	Req	Time
1	Manager	2:33	4	Check	1:47
2	Service	1:30	6	Service	1:20
3	Check	1:15	7	Manager	1:13
5	Manager	1:10	9	Check	1:03
8	Check	1:00	10	Service	:58
3	Service	:50	1	Manager	:46
5	Check	:32	4	Manager	:29

Screenshot when using touchscreen monitor

Operation:

Each table has a three button transmitter. When a guest requires service, they press one of three buttons. The tabletop transmitter then sends a message to the touchscreen monitor or pager alerting staff of the table number and the request. The server sees or receives the alert and responds, clearing the request table side. Service times can be monitored with the touchscreen unit. When a request exceeds the service time goal, a message is sent to the manager's alphanumeric pager allowing him to respond if necessary.

Benefits:

- On-demand service significantly increases check averages
- Improves service response times
- Increases table turns
- Enhances customer service
- Keeps servers responsive

Features:

- Easy to Install
- Programmable buttons (i.e. service, check please, manager)
- Manager repage alerts manager when a server does not respond
- Monitors service response times
- Operates on (1) AA battery
- Visual alert on PC when battery is low
- Manager and staff may be paged directly from the touchscreen
- Compact, tamper-resistant design may be fastened to the table

Ideal for:

- Restaurants
- Comedy Clubs
- Theaters
- Casinos
- Bars

System Components:

- T7503 Transceiver
- Alphanumeric Pagers
- Optional wrist band for pagers
- Tabletop Transmitters
- 17" Touchscreen Monitor*

* May be replaced with standard monitor (LRS does not supply)

Rechargeable SP5 (NiMH)
E467 Battery Operated (AAA)
